

BATHROOM MIRROR HEATERS

Description

Our simple to install mirror heaters enable you to shave or put on make-up without having to worry about the bathroom mirror steaming up.

Lay the mirror face down on a protective surface. Make sure the back of the mirror is clean and free from grease. Mark the back of the mirror where the heater is to be positioned. The heater should be at least 50 mm from the edges of the mirror.

Peel back the protective release paper from one corner of the mirror heater. Position this corner in the required corner of the marked area and slowly peel back the release paper whilst applying gentle pressure to remove air bubbles.

The Caleско Mirror Heater must be connected to the lighting circuit or to the electrical circuit through a separate switch. The installation must be in accordance with existing regulations.

Easy Installation

1. Lay the mirror face down on a protective surface.
2. Make sure the back of the mirror is clean and free from grease.
3. Mark the back of the mirror where the heater is to be positioned. The heater should be at least 50 mm from the edges of the mirror.
4. Peel back the protective release paper from one corner of the mirror heater. Position this corner in the required corner of the marked area and slowly peel back the release paper whilst applying gentle pressure to remove air bubbles.
5. The Caleско Mirror Heater must be connected to the lighting circuit or to the electrical circuit through a separate switch. The installation must be in accordance with existing regulations.
